

Advanced Restorative Reproductive Medicine with

Hosted by: Dr. Phil Boyle, Dublin, Ireland.

When: August 8th, 2024

Time: 8:00am – 5:00pm PDT (4pm -1am GMT+1 London, UK)

Where: Room 105, Allard Hall ([UBC Law School](#)), [University of British Columbia](#), Vancouver, BC, Canada.

Hybrid: The option to instead join by video-conference is offered, as well as recording access.

Accommodation & Venue Information: <https://rrmcongress.com/accommodation/>

Registration:

IIRRM Members: <https://iirm.org/icsc-members/>

Non-Members: <https://iirm.org/icsc-register/>

Dr Phil Boyle is the president and director of NeoFertility. As well as being a fertility expert and a clinician using RRM in his own practise, he is a published researcher and is actively training other clinicians in RRM techniques. He is a frequent and popular speaker at sessions and conferences. Dr. Boyle and his team will be presenting a full-day course on Advanced Restorative Reproductive Medicine at the pre-conference immediately preceding IIRRM's 20th International Congress (ISCS4RRM).

CME Credit: 7 CME credits through the **AAFP** (live or self-paced)

Who is this course designed for?

This course will be especially relevant for healthcare professionals who have completed some RRM training and are in clinical practice. Less experienced providers and resident/students are also welcome! It is recommended those attending have taken the [NeoFertility online training](#) in advance of this meeting, so we have a better foundation to build upon. It will be offered at a 25% discount if purchased in combination with this workshop. Ideally, participants will be familiar with some form of FABM (Fertility Awareness Based Method).*

What will be covered?

This comprehensive program delves into the evolution of Restorative Reproductive Medicine (RRM) and provides a multifactorial approach to RRM treatment. Beginning at 8 am with a networking breakfast and meet-and-greet over tea and coffee, the day progresses with sessions covering pivotal topics such as case reports, pregnancy management—including real-case chart interpretation and treatment adjustments—immune-modifying treatments, and in-depth case reviews of successful outcomes and resistant cases. With interactive sessions and ample opportunities for Q&A throughout the day, attendees will also explore strategies for clinical practice, novel approaches for challenging cases including Luteinized Unruptured Follicle (LUF), recurrent miscarriage, and repeated failed IVF. Join this pre-conference for a stimulating day of learning, collaboration, and advancement in reproductive health management.

* We encourage you to sign up for the NeoFertility app at www.ChartNeo.com, which can be used with any form of FABM. You can create an account at <https://chartneo.com/SignUp>. The app is free to download, and allows users to share their detailed charting data with you as their healthcare professional. While not mandatory, many have found this can make the process of cycle tracking and treatment of infertility much easier to manage.

Course Schedule:

August 8, 2024	ALL TIMES IN LOCAL TIME (PDT)
8:00 am	Meet and Greet, Breakfast, tea and coffee
9:00 am	The evolution of RRM from fertility awareness to multifactorial restorative treatment
9:45 am	Q and A
10:00 am	Case Reports
11:00 am	Break. Tea, Coffee, snack, and chat.
