Call for Abstracts: 22nd International Clinical & Scientific Congress for Restorative Reproductive Medicine

Event Date: October 9-10 2026
Accommodation: https://rrmcongress.com/accommodation/
Location: Marriott Orlando Airport Lakeside Hotel, 7499 Augusta National Dr, Orlando, FL 32822, USA
Congress Website: https://rrmcongress.com/

Dear Colleagues,

The International Institute for Restorative Reproductive Medicine invites you to submit a scientific abstract for poster presentation consideration at the 2026 International Clinical & Scientific Congress for Restorative Reproductive Medicine, hosted in Orlando, Florida, USA on October 9-10 2026, with pre-conference courses on October 7-8, 2026. Abstracts will be presented as posters on October 9 & 10, with the opportunity for rapid presentations in the main conference room from the top abstracts in each category.

Abstracts are welcome in any area relevant to restorative reproductive medicine (RRM) and should reflect work in process or work completed but not yet published. Abstracts may be of original research, systematic literature reviews, theoretical development, systematic clinical observation, or clinical quality improvement. Case reports and case series will also be considered for presentation.

Presenting your research at the Congress serves as an avenue to gain recognition and feedback for your work and contribute to the broader medical community. Authors of accepted abstracts will be given opportunities to share and discuss their work during scheduled poster sessions, as well as before and after the Congress. The IIRRM Congress also recognizes the top poster in each category through the Kathleen Copeland Poster Awards announced on Saturday before the closing of the Congress.

With the launch of the Journal of Restorative Reproductive Medicine last year we are excited to see the diverse range of research projects in development! You can learn more about the congress and programme at: https://rrmcongress.com/ and encourage you to share this information with your networks.

Please review the guidelines and important dates below. If you have additional questions don't hesitate to contact me or the IIRRM Conference Secretariat through the contacts provided below.

Sincerely,

Joseph Stanford, MD, MSPH

Abstract Guidelines: International Clinical & Scientific Congress for Restorative Reproductive Medicine

Abstracts are welcome in any area relevant to restorative reproductive medicine (RRM). RRM is any scientific approach to reproductive medicine that seeks to cooperate with or restore the normal physiology and anatomy of the human reproductive system. To address reproductive health problems RRM exclusively focuses investigations and treatments on identifying and correcting abnormalities, restoring or optimizing normal reproductive function.

Specific areas of interest include:

- infertility & recurrent pregnancy loss
- integrated systems of restorative reproductive medicine
- fertility awareness/fertility awareness based methods
- endocrinology
- andrology
- epidemiology
- immune aspects of infertility
- reproductive anatomy and physiology
- psychosocial dimensions of human reproduction
- women's reproductive health management
- environmental factors impacting human reproductive health
- research comparing restorative and non-restorative approaches to reproductive medicine
- other topics relevant to restorative reproductive medicine

Guidelines for Submission:

1. Abstracts may be of original research, systematic literature reviews, theoretical development, systematic clinical observation, case studies/case series, or clinical quality improvement. Abstracts should reflect work in process or work completed but not yet published.

2. Submission Deadlines:
   - Regular Submission Deadline: 1 May 2026
   - Late Submission Deadline: 15 August 2026

3. Abstracts must be submitted in English and are limited to a maximum of 500 words, including the title. Abstracts should not contain charts, diagrams, or tables. Do not include your name, affiliations or any reference to your company name (if applicable) or the names of any presenters/authors in the abstract. Use generic drug names instead of brand names wherever possible, as the use of specific brand names is strongly discouraged.

4. All abstracts must be submitted using the online abstract submission system. The contact details entered are those of the presenting author, who will be notified about the status of the abstract. If

additional authors were involved, the presenting author is responsible for informing the other authors about the status of the abstract.

5. You will receive an acknowledgement we received your abstract shortly after submission. If you do not receive a notice, please send an email to secretariat@iirrm.org to make sure we have received your abstract.

6. If you are submitting multiple abstracts for presentation each abstract must be submitted separately.

7. Each abstract is reviewed blindly and will be judged for scientific quality, innovation, and relevance to, and consistency with a restorative approach to reproductive medicine.

8. If your abstract is accepted, you will be asked to submit a current bio sketch, 100 words or less, for publication in the program and the IIRRM website and complete an online faculty disclosure, including disclosure of any potential conflicts of interest.

9. All presenters must register for the conference and pay the meeting registration fee.

10. Research posters will be displayed throughout the day of the meeting on both Friday and Saturday, with dedicated time for viewing, as well as during breaks. Top abstracts in each category will be invited to introduce their research as a 5-minute oral presentation during the proceedings of the main conference. This can be a walk through of your poster on one slide or consist of multiple slides.

11. Poster presenters will be provided with a stand to hold a standard poster size of 48" x 36". Your poster should not exceed this size. Orientation may be either portrait or landscape. Posters should identify the title of the paper, authors, and their affiliations at the top or bottom of their poster. Posters must be in English, however if you are invited for oral presentation you are welcome to present in Spanish or English. Further information and support for preparing and printing your poster can be found at: https://iirrm.org/tips-and-resources-for-creating-effective-research-posters/

12. Authors may present either in-person or online. All abstract presenters, regardless of their format, must display a poster in our Research Poster Gallery and provide an e-poster (PPTX, PDF, etc.) for those joining virtually. Printing can be arranged by the author, or a link for printing posters will be provided with delivery to the hotel. The cost of printing is the responsibility of the authors.

13. **Awards**: The IIRRM Annual Conference Poster Special Recognition recognizes the top posters in one of 4 categories :

- Student/Resident Award
- Case Report/Case Series Award
- Clinical & Science Award – Early Practice/Career (first 5 years)
- Clinical & Science Award – Mid/Late Career (6 years+)

Congress delegates are invited to view and discuss with authors the posters, and vote for the top poster in each category. With the exception of case reports/series, which is a separate category, all

awards are based on the first author of the paper. Posters are evaluated for research quality and scientific impact of the research to advance knowledge or practice in the field of restorative reproductive medicine. Awards will be announced, and the recipients will be recognized during the closing of the Congress on Saturday, 10 October 2025.
